

AI Humanity Protocol - Full Project Document (v2.0.0-beta)

1. Project Title

AI Humanity Protocol - Using AI to Identify, Translate, Analyze and Deliver Help Requests to Humanitarian Organizations Globally.

2. Project Owner

Owned and initiated by Mohammad Ali Maghami Moghim

Email: M.maghani69@gmail.com

3. Project Vision

To create a humanitarian protocol powered by artificial intelligence that breaks language barriers and automates the distribution of help to those in need using smart routing, translation, verification, and classification systems.

4. Version 2 Highlights

- Full multilingual support (Arabic, Farsi, Hindi, Chinese, Spanish, etc.)
- Automatic translation of voice and text to English
- Needs classification (food, shelter, medical, etc.)
- Identity verification: face/voice matching, IP/GPS checks
- Smart routing: sending verified summaries to organizations like UNICEF, UNHCR, MrBeast, etc.
- Front-end submission form for global use

5. Repository Structure
